RubiCr supports modern operators with the technical resources to make sharper decisions and engineer their process for scale – across Ops, Sustainability, Energy, EHS, and Finance, from the shopfloor to the boardroom."

The products

RubiCr: The Operating Stack built for Modern Enterprises

Your Operational Intelligence Engine

Try Now

Operations Optimization

Real-time visibility into every operation – proven to lift productivity by **DX** across the plant.

Sustainability Performance

Build a complete sustainability strategy, track every metric, and run assurance systems trusted by **DX** companies.

Asset Performance Management

Monitor the performance and reliability of every asset in real time – without walking the floor, across **DX** assets or sites.

Heal & Safety Tracking

Predictive and vision-based catches safety risks early, incidents by **DX**.

How it works

RubiCr integrates data from all your data sources and runs it through your industry context. Operates like your individual technical services expert providing the right inputs at the right time

The morning after it goes live, your operations run on prediction – not reaction.

Tambi.ai : Your Best Technical Minds, Available 24/7

Identify operational opportunities and bottlenecks to improve operational efficiencies

Correlate responses across modules to give you the RootCause, not simply guesses

Access global datasets, including geospatial data to provide a real time risk simulation.

Automate reporting and dashboards: Empower your teams to deliver more

GreenArc: Specialized Expertise: For solving unique challenges

Production Optimization

Hands-on work to lift throughput and reduce downtime – engineered for your specific process, not a generic playbook.

Asset Utilization

Get more from the assets you already have – before any conversation about new capex.

Supply Chain Traceability

Build the traceability your buyers and regulators are starting to demand, supplier by supplier, material by material.

Inventory Management

Right-size inventory across raw materials and finished goods, so capital isn't sitting idle on the floor.

Health & Safety Improvement

On-ground assessments and fixes that close the gap between your safety policy and what actually happens on the floor.

Energy & Sustainability Strategy

Turn compliance obligations into a real energy and decarbonization roadmap – not just a reporting exercise.

Optimize Operations. Improve your margins
